About

Front-End & Back-End Web Developer proficient in building full-stack applications using HTML, CSS, JavaScript, PHP, and the Laravel framework. Demonstrates practical expertise through projects including responsive websites, a CRUD application using MVC architecture, and a secure admin authentication system. Skilled in implementing dynamic front-end layouts, managing backend logic with MySQL, and debugging code to resolve issues efficiently. A collaborative developer focused on meeting project deadlines and delivering high-quality solutions.

Experience

Web development

Brains College

September/2025 - Present

Assisted in developing and maintaining web applications under training supervision

Implemented frontend layouts using HTML, CSS, Bootstrap, and JavaScript

Worked with PHP and MySQL to handle backend logic and data management

Practiced Laravel framework concepts including routing, controllers, and views

Followed MVC architecture and basic coding standards

Bachelor of Science in Information Technology

University of the Punjab

Field: Information Technology

September/2016 - December/2020

Advance Website Development

NAVTTTC

Field: Web development

September/2025 - Present

Projects

Portfolio Website

<https://zainabidrees.online/>

Designed and developed a personal portfolio website with a responsive layout. Implemented a contact form connected to the database and created a secure admin panel to view and manage user inquiries.

Admin Panel & Authentication System

Developed a secure admin authentication system to manage user data. Implemented login functionality, input validation, and dynamic data display from the database.

CRUD-Based Web Application

Built a CRUD-based web application following MVC architecture. Implemented Create, Read, Update, and Delete operations with proper database handling.

Responsive Frontend Websites

Created multiple responsive web pages ensuring cross-browser compatibility and mobile-friendly design.

Contact Management System

Developed a contact management system to store and manage user information with secure backend integration.
